# Quality and design with Coastline Collection

Crafted with meticulous attention to detail, Coastline features a wide range of oak colours, each capturing the essence of the Australian Coastline in its own unique way. From the sandy hues of driftwood to the weathered, sun-bleached greys reminiscent of old boardwalks, this collection offers a variety of options to suit every style and taste.

## Features and Benefits

Perfect for families

Easy to clean and maintain

Complete matching accessories

Hydronic heated slab compatible\*

Stylish and natural finish

High durability

Portsea

\*Please refer to our Installation Instructions and Heated Slab Instructions for more information on our website.

## 190mm

Coastline 190mm Collection is set apart by its innovative construction. Each plank is made using a high-quality European Oak veneer, combined with a multi layered plywood core for superior stability, complemented by a matte, wire brushed surface finish. This construction method ensures exceptional durability and longevity, making Coastline flooring ideal for both residential and commercial spaces with heavy foot traffic.

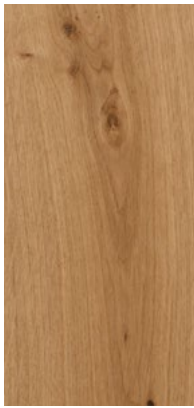

### Bunbury

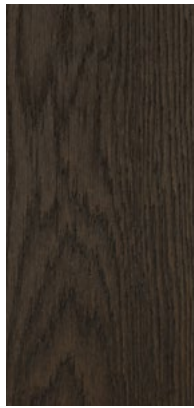

Perfect for modern, classic or contemporary coastal homes, Bunbury is inviting and warm with natural oak timber tones reminiscent of the sandy dunes of the Bunbury foreshore.

Colour and grain will vary while some knots are to be expected. Timber flooring is not colour-fast, and the colour will change over time when exposed to UV light. Please refer to our Technical data sheets, Care & maintenance, and Warranties for more information on our website.

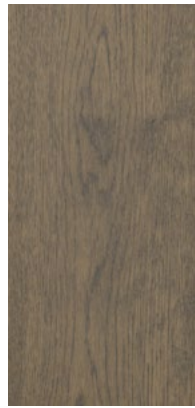

We cannot guarantee that the colour you see printed on this brochure accurately portrays the true colour of the floorboard. Swatch colours can be verified by ordering a complimentary offcut sample from our website or visiting a Coastline Collection retail partner to view in-store.

Warranty

**05** YEAR  
Commercial Wear  
Warranty

**Life** TIME  
Structural Warranty

\*Nested boards refer that the packs contain both short and full length boards. Minimum length 600mm.

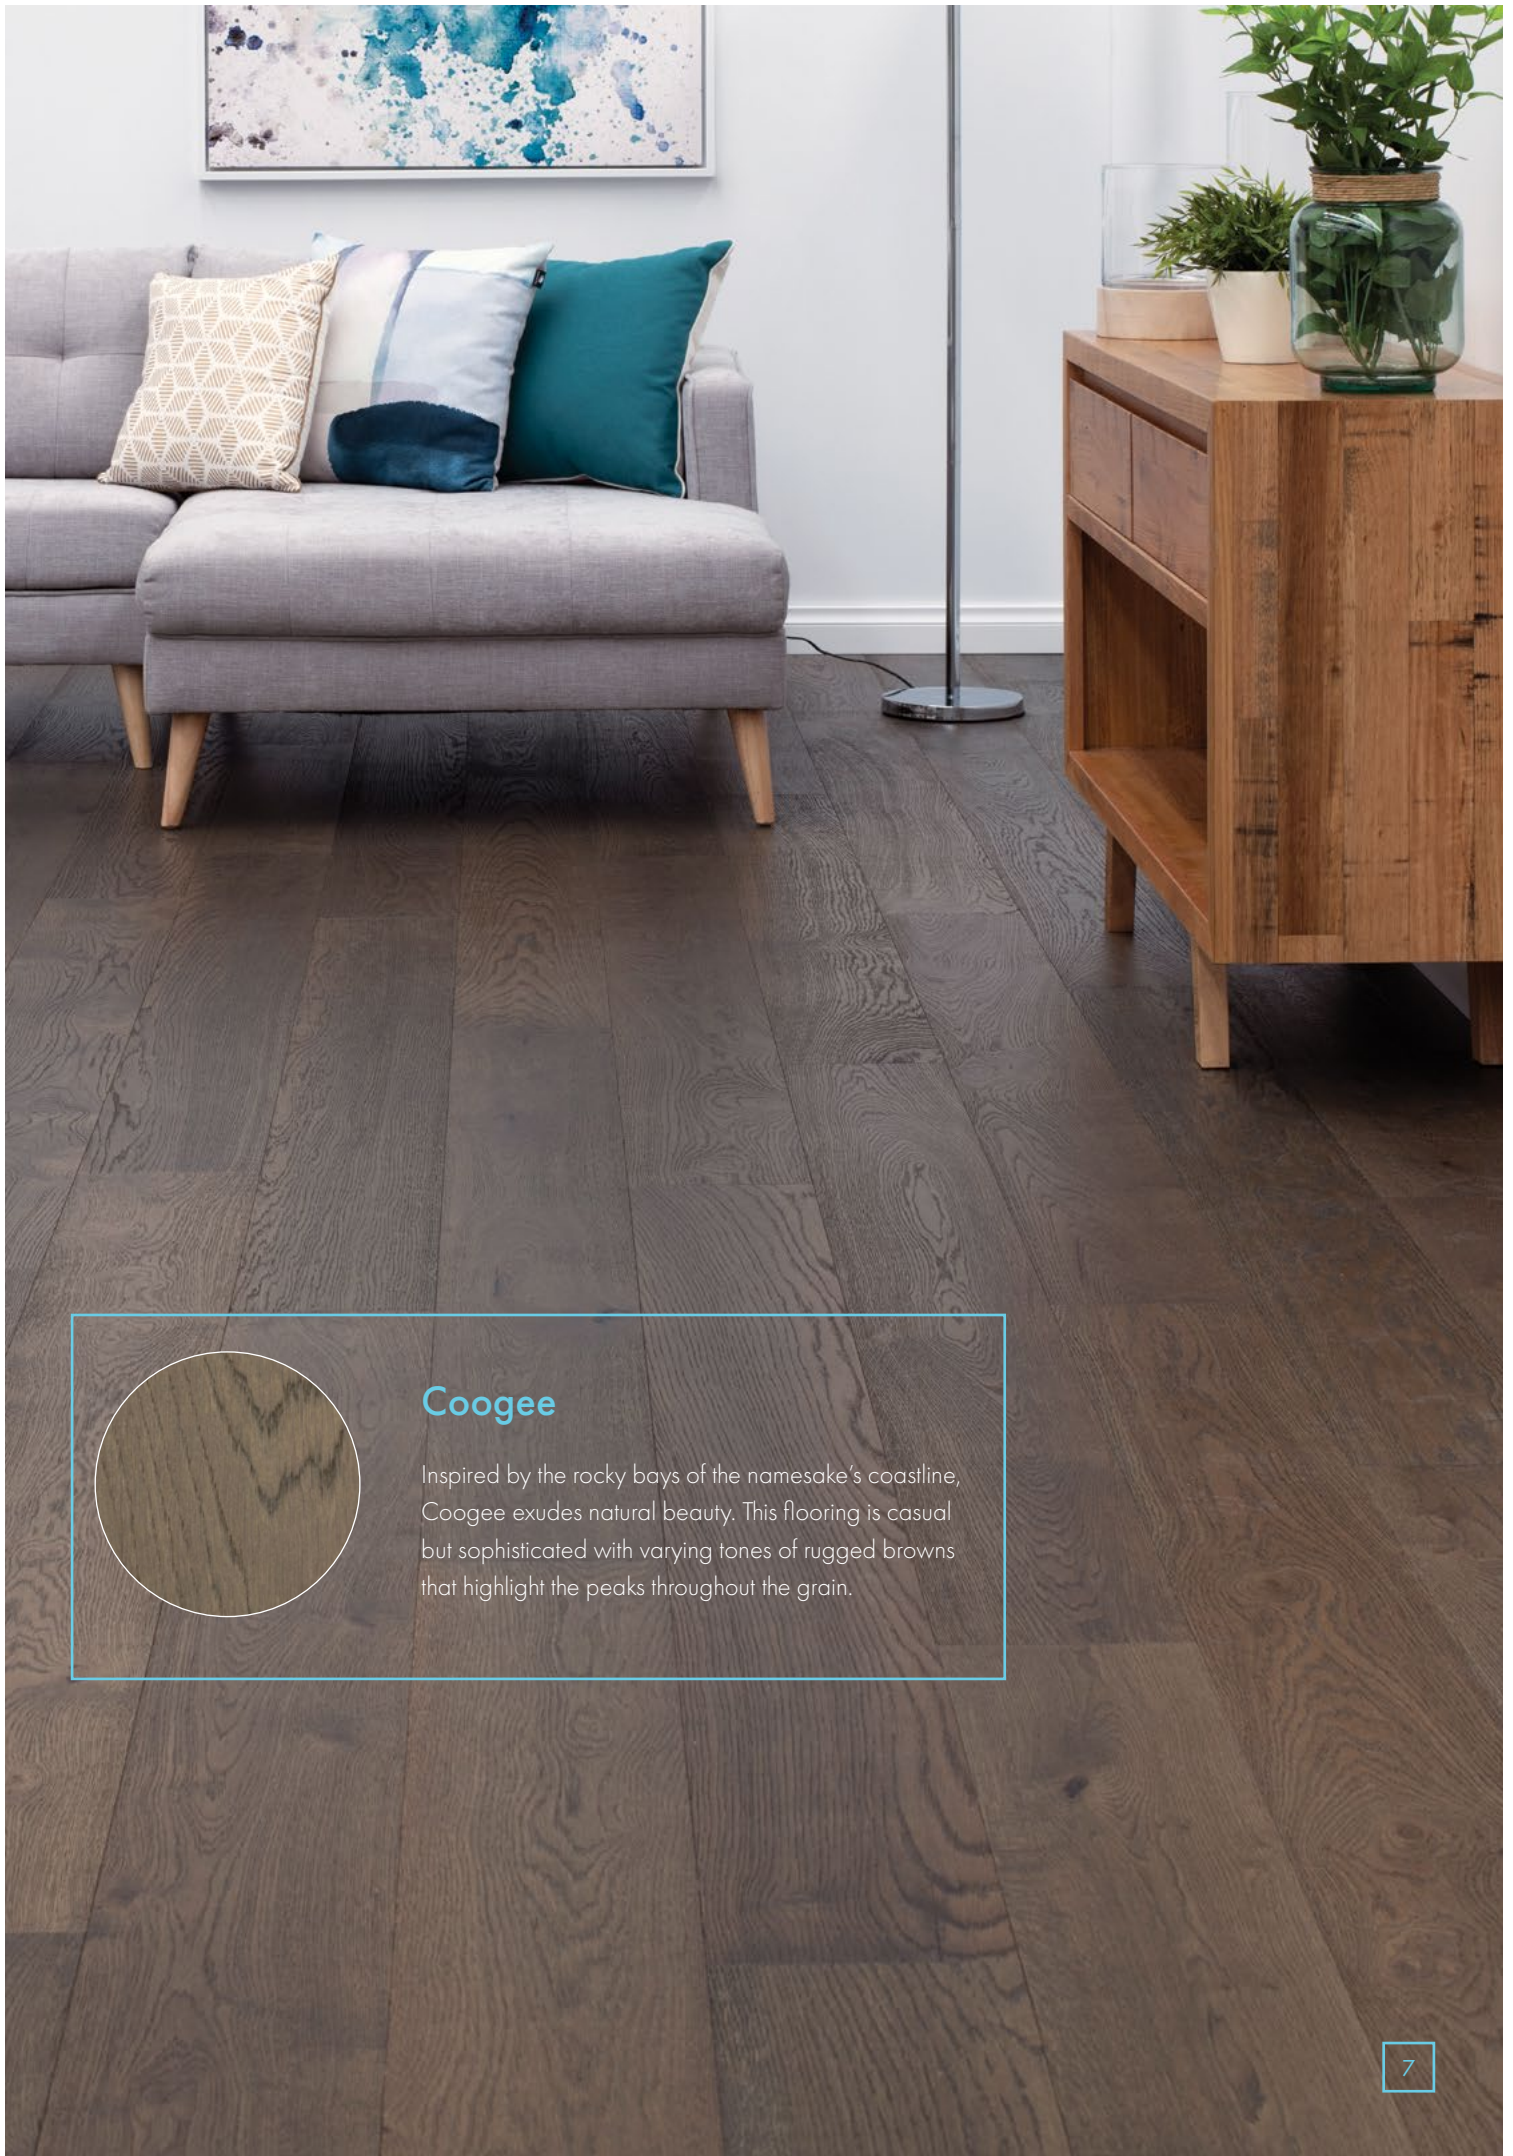

## Uniquely constructed for superior stability

As today's market is seeing an increase of wider and longer boards, the need for stability in the construction of engineered floorboards is forever evolving.

Coastline Collection uses the proven method of a multi ply core, this unique assembling method creates a product more stable than others. Multi ply construction is made up of multiple thin hardwood sheets that are arranged, glued and pressed with the grain running at right angles to the adjacent sheet.

Using several layers at its core results in advanced strength and a structurally stable board, ensuring a product with high density that is less susceptible to water ingress and is compatible over hydronic heated slabs.

## Coogee

Inspired by the rocky bays of the namesake's coastline, Coogee exudes natural beauty. This flooring is casual but sophisticated with varying tones of rugged browns that highlight the peaks throughout the grain.

## Herringbone

The Coastline Herringbone Collection offers six complementary colours from 190mm range, providing both style and versatility.

With its distinctive French pattern, Coastline Herringbone adds a touch of character that will enhance any interior.

This flooring, sized at 600mm x 120mm with a 3mm European Oak veneer, is ideal for modern designs.

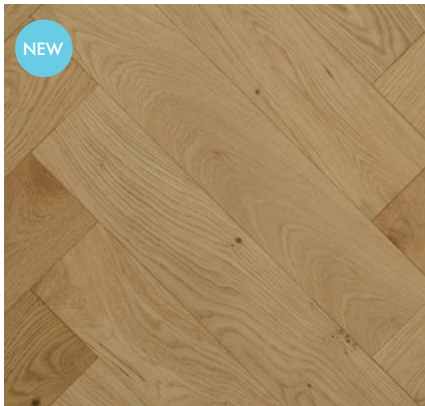

### Portsea

Portsea has stunning contrasts of sandy beige throughout the grain that mimic the long stretches of sand along this popular Australian peninsula.

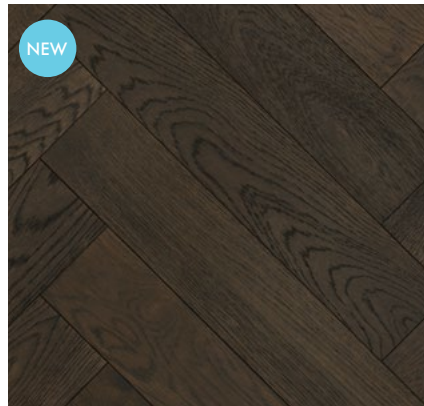

Colour and grain will vary while some knots are to be expected. Timber flooring is not colour-fast, and the colour will change over time when exposed to UV light. Please refer to our Technical data sheets, Care & maintenance, and Warranties for more information on our website.

We cannot guarantee that the colour you see printed on this brochure accurately portrays the true colour of the floorboard. Swatch colours can be verified by ordering a complimentary offcut sample from our website or visiting a Coastline Collection retail partner to view in-store.

# Coastline Collection is your environmentally sustainable choice

The Coastline Collection uses 90% less hardwood in the top veneer when compared to a traditional solid hardwood floor. We are proud to contribute positive change to the flooring industry by reducing our impact on the environment by selecting only certified and forestry managed plantation timbers.
